

## ALLIED HEALTH LEADERSHIP DAY | TUESDAY 29 AUGUST 2017

### Exceptional Leadership: Driving innovation together in a changing Allied Health landscape

Allied Health Professionals are ideally suited to take the roles of transformative leaders and influencers of change in order to optimise health outcomes and provide innovative solutions to complex challenges.

Modern approaches to leadership identify “ordinary leaders” as having the power and influence to leverage real and lasting system wide change.

This highly practical and interactive master class exposes current thinking and perspectives of leadership, and workshops the potential every participant has to develop and enhance their own leadership skills in order to drive innovation and excellence in their own workplaces.
